

SCE Critical Peak Pricing

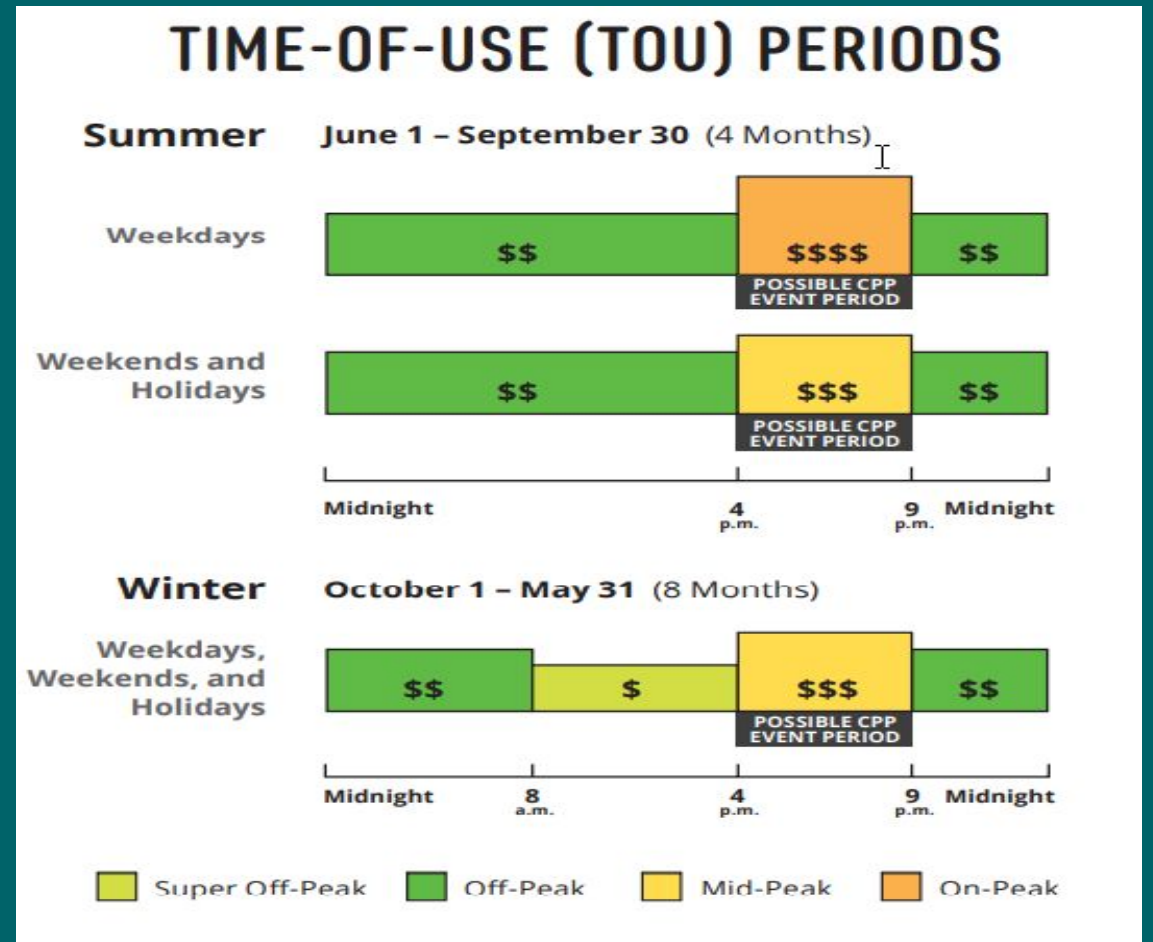

Damon Hannaman Senior Advisor Key Accounts

Energy for What's Ahead®

Critical Peak Pricing

- Optional rate that provides summer season bill credits in exchange for paying higher electricity prices during 12 to 15 annual CPP events.
- Events are from 4 p.m. – 9 p.m. on any day of the week, usually occurring on the hottest summer days.
- By reducing electricity use during CPP events, you can minimize these higher prices.
- Earn credits on your electricity bills during the summer season when your bills are typically the highest.
- Bill protection for the first 12 Months—you won't pay more than you would have paid on your previous rate.

Critical Peak Pricing– Event Triggers & Notifications

- California Independent System Operator (CAISO) Energy Emergency Alert (EEA) Watch, EEA-1, or EEA-2 Notice
